

Children's Theatre of Charlotte & Experiential Theater Company

GRIMMZ Fairy Tales

Technical Rider-Proscenium or Thrust

STAGE CONFIGURATION

Standard space required for on-stage scenery and is 35' wide x 25' deep x 16' in height. If there are any physical limitations you have for your space, please let us know and we will make necessary accommodations. The set has been designed for flexibility, so precise spacing will be determined on a venue by venue basis.

LIGHTING

We travel with two light truss systems which are completely self-contained with LED lights and are controlled from backstage with our own light board. These systems require standard Edison outlets for AC power.

The lighting requirements are three general full-stage washes and various specials and template washes:

1. 1 Full Stage Wash (Area isolation, if possible).
2. 10 individual ellipsoidals for front lights
3. 12 individual ellipsoidal lights (for specials focused on specific areas)

SOUND

All sound effects are accessed on Q-Lab from a portable Apple laptop. Ideally, we are able to connect our laptop to an existing house sound system and make use of venue-provided sound system. Please alert us if you are unable to provide house sound system hook-up.

5 actor wireless microphones and sound packs. These microphones will be provided by the venue, unless otherwise discussed. Please alert us if you are unable to provide wireless microphones and sound packs.

CREW REQUIREMENTS

Assistance when **loading in** the production should include 1 house electrician, 1 house sound technician, 2 venue-provided scenic crew members and 2 venue-provided lighting crew members.

During the performances venue should provide 1 Sound Board Operator (for balancing microphones), 1 house electrician, and 2 Backstage Crew Members.

SCENERY

1. All scenic elements will be provided by Experiential Theater Company. The set consists of a brick façade 24' wide x 15' high x 4' deep made of Hollywood-style flats which are c-clamped together and two lighting trusses 8' wide x 15' high x 1.5' deep. The scenery can be placed in various configurations depending on the stage dimensions. The set has been purposefully designed for flexibility.
2. Depending on stage dimensions, at a mutually-agreed-upon distance, upstage blacks and legs should be hung to provide masking. This is not actually necessary, as the aesthetic for the show is a concert, but if no masking is available, then provision should be discussed for props tables and locations for quick-changes.
3. When possible, we travel with four concert posters which we typically hang in the lobby or house. Each poster is framed and is 2' x 3'. During advance we can discuss locations that might be appropriate.

PROMOTIONAL MATERIALS

As per prior agreements with developmental supporters, all promotional materials limited to programs and posters need to have the following language displayed legibly:

Children's Theatre of Charlotte & The Experiential Theater Company
presents:

GRIMMZ Fairy Tales

GRIMMZ Fairy Tales was first seen at Children's Theatre of Charlotte, Charlotte, NC in February 2020;
Adam Burke, Artistic Director; Linda Reynolds, Managing Director.
